

# BLING EARRINGS

RHINESTONE, CRYSTAL AND SILVER BEADS

## Supplies needed:

- Round nose pliers\*
- Wire cutter\*\*
- 2 needle nose pliers

*\* for making loops; regular needle nose pliers can be used if you don't have round-nose*

*\*\* many needle nose and round nose pliers also have a wire cutter on them*

## Kit includes:

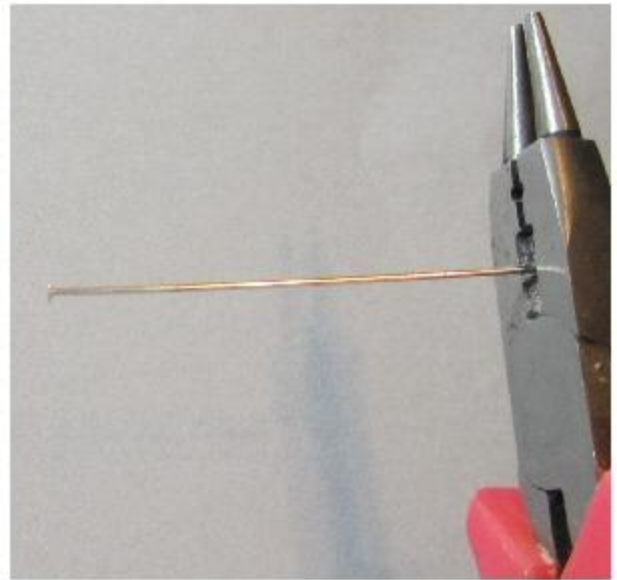

- 2 rhinestone beads
- 4 filigree bead caps
- 2 large crystal beads
- 2 medium crystal beads
- 2 small crystal beads
- 2 oblong faceted silver beads
- 2 round silver beads
- 2 headpins
- 2 small jump rings
- 2 ear hooks

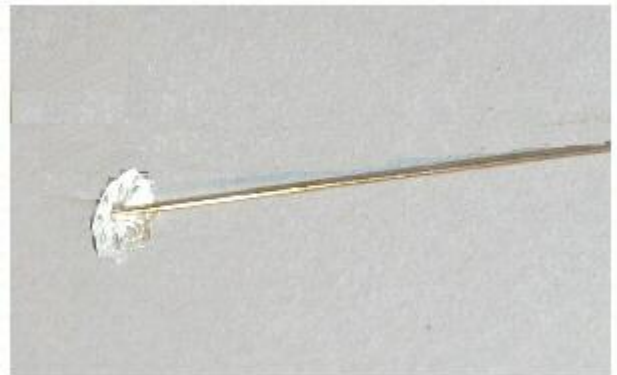

## Directions:

Make the dangle

- Cut ¼ inch off the end of the headpins opposite the end with the flat head
  - Most cutters have a flat side and an angled side - use the flat side for a smoother cut

- On the headpin, thread:
  - A filigree bead cap from the domed side

- The rhinestone bead
- A filigree bead cap from the cupped side

The filigree bead caps “hug” the rhinestone bead

- Continue threading onto the headpin:
  - A large crystal bead
  - An oblong faceted silver bead
  - A medium crystal bead
  - A round smooth silver bead
  - A small crystal bead

- Use the round needle nose pliers to form a loop at the top of the dangle

- Use 2 needle nose pliers to twist a small jump ring open
  - To do this, hold the jump ring between the tips of both pliers with the cut section at the top
  - Twist to open
- Put the dangle onto the open jump ring

- Add an ear hook
- Twist the jump ring closed
  - Make sure the ends meet exactly

Repeat to make the other earring.
